

**ABABIL**  
MEDTECH INNOVATIONS INDIA PRIVATE LIMITED

# VENTILATOR CIRCUIT

## (Disposable)

### KEY FEATURES

- ✓ Dual-limb design for inspiratory and expiratory separation.
- ✓ Disposable, single-use-reduces cross-contamination risk.
- ✓ Plain (non-heated, non-water trap) design.
- ✓ Lightweight and flexible for ease of handling.
- ✓ Universal connectors compatible with standard ventilators and anesthesia machines.
- ✓ Transparent tubing for easy inspection.

Product Code : AMI-ADLC-1001

### TECHNICAL SPECIFICATIONS

| Parameter                            | Specification                                            |
|--------------------------------------|----------------------------------------------------------|
| Patient Type                         | Adult                                                    |
| Circuit Type                         | Dual Limb, Plain                                         |
| Tube Length (Inspiratory/Expiratory) | 1.5 m (standard, customizable available)                 |
| Tube Diameter (ID/OD)                | 22 mm / 23 mm                                            |
| Material                             | Medical-grade, non-toxic PVC                             |
| Connectors                           | 22M/22F standard (ISO 5356-1 compliant)                  |
| Compliance                           | Low compliance design for accurate tidal volume delivery |
| Shelf Life                           | 3 years (unopened packaging)                             |
| Packaging                            | Individually packed                                      |
